

TARGET MARKET DETERMINATION

Made By: **Oncosil Medical Limited** ACN 113 824 141 (ASX code: **OSL**)
(**Company** or **Oncosil**)

Product: Listed options to acquire fully paid ordinary shares in the capital of the Company (**New Shares**) pursuant to an entitlement offer under a prospectus dated 25 March 2024 (**Long Dated New Options**)

Effective Date: 25 March 2024

1. About this Document

This target market determination (**TMD**) has been produced by the Company in relation to an offer of Long Dated New Options by the Company and seeks to help investors understand who the offer of Long Dated New Options is suitable for having regard to the objectives, financial situation and needs of that target market.

This document is not a full summary of the Long Dated New Option's terms and conditions and is not intended to provide financial advice. Investors are strongly recommended when making a decision about the Long Dated New Options to read in full the Prospectus dated 25 March 2024 (**Prospectus**) issued by the Company which outlines the relevant terms and conditions under the Long Dated New Options. The Prospectus was issued by the Company pursuant to section 713 of the *Corporations Act 2001 (Cth)* (**Corporations Act**).

A copy of the Prospectus can be downloaded from the Company's website: www.oncosil.com.

Terms not defined in this TMD have the same meaning as given to that term in the Prospectus.

The offers under the Prospectus (collectively **Offers**) comprise a non-renounceable rights issue offer (**Rights Issue Offer**) with no minimum raise and a maximum raise of approximately \$5.65 million (**Maximum Subscription Amount**) and a Shortfall Offer (described below).

Pursuant to the Rights Issue Offer, Eligible Shareholders are entitled to subscribe for 1 New Share for every 2 Shares held at the Record Date (being 28 March 2024). Shareholders who subscribe for their full entitlement under the Offer (**Entitlement**) may also subscribe for Additional New Shares under the Top Up Facility (**Top-Up Offer**). The Top Up Facility comprises, in aggregate, all New Shares not subscribed and issued to Shareholders that could have been issued under the Rights Issue Offer (i.e. up to the Maximum Subscription Amount).

Where the Company does not receive acceptances for the entire Maximum Subscription Amount from Eligible Shareholders under the Rights Issue Offer (including applications under the Top Up Offer), the board of directors of the Company (**Board**) has also reserved the right for the Company, after issuing as many Additional Shares for which it receives subscriptions from Eligible Shareholders, to place some or all of the shortfall under the Rights Issue Offer (the **Shortfall**) for a period of 3 months after the Rights Issue Offer closes (**Shortfall Offer**). The Offers are not underwritten.

Under the Prospectus, for every two New Shares issued under the Rights Issue Offer, Top Up Offer and the Shortfall Offer, the Company will issue one (1) listed Option exercisable at

3 cents each and an expiry date of 30 April 2027 (each a **Long Dated New Option**) and two (2) unlisted Options exercisable at 0.9 cents each and an expiry date of 30 June 2025 (each a **Short Dated New Option**).

This TMD is in relation to the Long Dated New Options only. In respect of the Short Dated New Options, please refer to the Company's additional Target Market Determination dated 25 March 2024 which is also available on the Company's website: www.oncosil.com.

Allocation of New Shares under the Top-Up Offer shall be scaled back at the discretion of the Board if applications exceed the available Additional Shares. Allocation of any Shortfall remaining after allocation of all subscribed Additional Shares shall be at the discretion of the Board, and may also include some scaling back of applications made.

The Company's Shares and certain Options (**ASX code OSLO**)(with the same terms as the Long Dated New Options) are presently traded on the ASX and it is proposed that the Company will seek quotation of the Long Dated New Options on the ASX as additional options in the existing quoted class (ASX code OSLO). However there is no guarantee as to what price the Long Dated New Options may trade on the ASX nor the volume / market for such Long Dated New Options.

All of the Offers will be made under the Prospectus. All recipients of this TMD are recommended to consult their professional adviser if they have any questions regarding the contents of the Prospectus.

Any recipient of this TMD who wishes to apply to be issued Long Dated New Options under the Offers will need to make payment for the Offers pursuant to the terms of the Prospectus (for the Rights Issue Offer) or the Shortfall Application Form (for the Shortfall Offer), as the case may be, that accompany the Prospectus. There is no cooling off period in respect of the issue of the Long Dated New Options.

The Company is not licensed to provide financial product advice in relation to the Long Dated New Options nor the Offers.

This TMD is not a disclosure document for the purposes of the *Corporations Act 2001 (Cth)*, and therefore has not been lodged, and does not require lodgement, with the Australian Securities and Investments Commission (ASIC) nor does it contain a full summary of the terms and conditions of the Long Dated New Options. This TMD does not take into account your current financial position or circumstances nor what you intend for the future.

2. Target Market

The information below summarises the overall class of investors that fall within the target market for the Long Dated New Options, based on the product key attributes and the objectives, financial situation and needs that they have been designed to meet.

Factor	Target Market
Investment Objective	As the Long Dated New Options will expire on 30 April 2027 (Expiry Date), the Company expects that an investment in the Offers (which includes an investment in the Long Dated New Options) will be suitable for investors who wish to have a right, but not an obligation, in the medium term, to acquire Shares in the Company prior to the Expiry Date.

	<p>The Company expects that an investment in Long Dated New Options will be suitable to investors who wish to gain exposure to equities in a small/mid-cap medical device company listed on the Australian Securities Exchange (ASX), the exposure being the New Shares, the Long Dated New Options, the Short Dated New Options and the Shares that underlie both the Long Dated New Options and Short Dated New Options. It is proposed that the Company will seek quotation of the Long Dated New Options on the ASX as part of the existing class of listed options with the ASX Code OSLO.</p> <p>The Long Dated New Options are likely to be for investors who are entitled to apply for them under the Prospectus and are seeking:</p> <p>(a) to profit from an appreciation in the market price of Shares in Oncosil by exercising the Long Dated New Options prior to their Expiry Date; or</p> <p>(b) reduce risk by locking in a price to purchase or sell underlying Shares,</p> <p>and in either case who are accustomed to participating in speculative investments in the medical device sector - but investors should first consider the Prospectus, including the risk factors relating to an investment in securities of the Company.</p> <p>The Long Dated New Options are not designed for investors who require an income stream from their investment in the Long Dated New Options.</p>
Investment Timeframe	<p>The target market of investors will take a medium term outlook on their investment and are in a financial position that is sufficient for them to invest their funds over the period from the issue date of the Long Dated New Options until their Expiry Date to increase their shareholding and exposure to the potential upside in the Company's Shares into the future.</p> <p>Given the need to pay the exercise price in order to acquire Shares, Investors in the target market are in a financial position that is sufficient for them to invest their funds over a (approximately) 3 year time horizon should they wish to exercise their Long Dated New Options.</p> <p>An investment in the Shares, Long Dated New Options and Short Dated New Options under the Offers or the resulting Shares on exercise of the Options should be regarded as highly speculative.</p>
Investment Metrics	<p>As eligibility for investment is restricted to existing Shareholders for the Rights Issue Offer, and Shortfall Investors for the Shortfall Offer, it is expected that the target market of investors will be able to withstand potential fluctuations in the value of their investment, especially as the Long Dated New Options are being issued for no additional consideration.</p> <p>An exercise price is required to be paid for the issue of the Shares on exercise of Long Dated New Options. As such, the capacity to realise the underlying value of the Long Dated New Options would require that they be exercised on or before the Expiry</p>

	<p>Date or, if there is demand, trading the Long Dated New Options on the ASX prior to the Expiry Date - presumably where the trading price of the underlying Shares is above the exercise price for the Long Dated New Options.</p> <p>The Long Dated New Options (and the resulting Shares) offer no guarantee that there will be a liquid market or any guarantee of the price at which the underlying Shares may trade, any income, capital protection or gains.</p>
Risk of Investment	<p>The Company considers that an investment in the Company upon the exercise of the Long Dated New Options is highly speculative, such that an investment in the Company is not appropriate for an investor who would not be able to bear a loss of some or all of the investment.</p> <p>Investors should also have a sufficient level of financial literacy and resources (either alone or in conjunction with an appropriate adviser) to understand and appreciate the risks of investing in Long Dated New Options as an asset class generally and the more specific risks of investing in an Australian listed medical device company.</p> <p>There is a substantial risk that the Long Dated New Options may become:</p> <ul style="list-style-type: none"> • lower in value in the event that the Company's Share price does not appreciate or decreases; and • worthless if the Company's Share price on the Expiry Date is less than the exercise price of Long Dated New Options
Excluded class of consumers	<p>The Long Dated New Options are not suitable for investors:</p> <ul style="list-style-type: none"> • who are not seeking to have the potential to increase their investment in the Company; • who do not understand and appreciate the risks of investing in options as an asset class generally and the more specific risks of investing in the Company; • who require an income stream from their investment; • who do not ordinarily invest in speculative investments in the medical device sector; and • who are resident outside Australia and New Zealand and therefore are not applicants under the Rights Issue Offer.

3. Distribution Conditions

The Rights Issue Offers (including the Top-Up Offer) are being made to shareholders who are registered as a holder of Shares as at the Record Date (7.00pm on 28 March 2024) (**Record Date**) and have an address on the Company's share register in Australia or New Zealand (**Eligible Shareholders**). The Shortfall Offer is by invitation only and may be made to other investors who are not Eligible Shareholders. The Prospectus includes these jurisdictional conditions on eligibility.

The Long Dated New Options will first be issued to Shareholders who subscribe under the Rights Issue Offer and the Top-Up Offer. If there remains any Shortfall after these subscriptions the Long Dated New Options will be issued to other subscribers under the Shortfall. The Board has reserved the right to place New Shares (and accompanying Long Dated New Options and Short Dated New Options) under the Shortfall Offer for the 3 months after the close of the Rights Issue Offers. Applications for Long Dated New Options will be scaled back under the Top Up Offer where the number of Additional Shares applied for exceeds the Shortfall, or scaled back under the Shortfall Offer where the number of New Shares (and accompanying Long Dated New Options) applied for exceeds the Shortfall.

The Long Dated New Options can only be distributed by the Company by making an application for New Shares (and accompanying Long Dated New Options) pursuant to the terms of the Prospectus.

The Company has emphasised that an investment in the Long Dated New Options, and in the Shares underlying the Long Dated New Options, is speculative in nature and not suitable for investors for whom such an investment is inappropriate. The Company considers that these distribution conditions will ensure that persons who invest in Long Dated New Options fall within the target market in circumstances where personal advice is not being provided to those persons by the Company.

4. Review Triggers

The Long Dated New Options are being offered for a limited offer period set out in the Prospectus, after the conclusion of which the Long Dated New Options will no longer be available for investment by way of a new issue.

It follows that the TMD will only apply in the period between the commencement of the offer of the Long Dated New Options and the issue of the Long Dated New Options shortly after the close of the Offers (**Offer Period**), after which the TMD will be withdrawn.

To allow the Company to determine whether circumstances exist that indicate this TMD is no longer appropriate to the Long Dated New Options and should be reviewed, the following review triggers apply for the Offer Period:

- (a) there is a material change to the Long Dated New Option's key attributes that make it no longer consistent with the likely objectives, financial situation and needs of investors in the target market;
- (b) the Company lodges with ASIC a supplementary or replacement prospectus in relation to the Prospectus;
- (c) any event or circumstance that would materially change a factor taken into account in making this TMD or the Company otherwise identifies a substantial divergence in how the Long Dated New Options are being distributed and acquired from that described in this TMD;
- (d) the existence of a significant dealing of the Long Dated New Options that is not consistent with this TMD;
- (e) ASIC raises concerns with the Company regarding the adequacy of the design or distribution of the Long Dated New Options or this TMD; and
- (f) material changes to the regulatory environment that applies to an investment in the Long Dated New Options.

The Company may also amend this TMD at any time.

5. Review Period

If a review trigger occurs during the Offer Period, the Company will undertake a review of the TMD in light of the review trigger as soon as reasonably practicable and, in any case, within five business days of the review trigger occurring.

The Company will otherwise complete a review of the TMD immediately prior to the issue of Long Dated New Options under each of the Offers. As the Shortfall Offer may extend beyond the period of one month, the Company will undertake a monthly review of the TMD until the Offer Period expires.

6. Information Reporting

The reporting requirements of all distributors is detailed in the table below:

Reporting Requirement	Period for reporting to the Company by the distributor	Information to be provided
Whether the distributor received complaints about the Long Dated New Options.	<ul style="list-style-type: none"> For such time as the Offer Period remains open, within 10 business days after the end of each quarter. Within 10 business days after the end of the Offer Period. 	<ul style="list-style-type: none"> The number of complaints received. A summary of the nature of each complaint or a copy of each complaint.
A significant dealing of the Long Dated New Options that is not consistent with this TMD.	As soon as reasonably practicable after the significant dealing occurs, but in any event no later than 10 business days after the significant dealing occurs.	<ul style="list-style-type: none"> Details of the significant dealing. Reasons why the distributor considers that the significant dealing is not consistent with this TMD, <p>but subject to the Company's assessment of the ASX market and whether any "significant dealings" occur in an "off market" environment. In addition, it has no capacity to identify the objectives, financial situation and needs of any investors who acquire the Long Dated New Options.</p>
A summary of the steps taken by the distributor to ensure that its conduct was consistent with this TMD.	Within 10 business days after the end of the close of the offer of Long Dated New Options in accordance with the Prospectus.	A summary of the steps taken by the distributor to ensure that its conduct was consistent with this TMD.
